

HAMMED BABATUNDE BUARI

AI Evaluation Specialist | Product & UX Evaluator

Lagos, Nigeria | +234 807 407 3832 | hammedbuarib@gmail.com

hammedbuari.github.io | github.com/hammedbuari | linkedin.com/in/hammed-buari-940990414

PROFESSIONAL SUMMARY

AI Evaluation Specialist and Product & UX Evaluator with experience assessing AI-generated responses, digital products and user experiences through structured review methodologies, evidence-based reasoning and high-quality written feedback. Applies systematic assessment techniques to evaluate factual accuracy, reasoning quality, instruction adherence, usability and overall response quality. Combines a software development foundation with practical evaluation experience to identify failure modes, improve content reliability and support the development of dependable human feedback systems for AI and digital products.

PROFESSIONAL HIGHLIGHTS

- Built and published a documentation-first AI Evaluation Publication Platform demonstrating structured methodologies, independent reviews and canonical evaluation records.
- Experienced in evaluating AI-generated responses across factual accuracy, reasoning, instruction adherence, usability and safety dimensions.
- Developed practical evaluation frameworks supporting consistent, repeatable assessment of AI systems and digital products.
- Combined AI evaluation, product assessment and software development knowledge to deliver structured human feedback and quality improvement recommendations.

CORE COMPETENCIES

AI Evaluation: AI Response Evaluation, Prompt Evaluation, Comparative Response Analysis, Rubric-Based Assessment, Reasoning & Factual Analysis, Human Feedback, Annotation & Classification, Quality Assurance

Product & UX Evaluation: Product Quality Assessment, Heuristic Evaluation, Usability Review, User Journey Evaluation, Experience Improvement

Data & Analysis: Data Validation, Data Quality Assessment, SQL, Microsoft Excel, Google Sheets

Technical: Python, Git & GitHub, HTML, CSS, JavaScript

Professional Practice: Structured Written Feedback, Evidence-Based Review, Critical Thinking, Pattern Recognition, Technical Communication

PROFESSIONAL EXPERIENCE

Freelance AI Evaluation & Technical Assessment Contributor

2025 – Present

- Evaluate AI-generated responses, technical content and enterprise deliverables using structured review methodologies and defined assessment criteria.
- Assess factual accuracy, reasoning quality, instruction adherence, clarity and overall response quality through comparative analysis and objective review.
- Produce structured written feedback that supports model improvement, evaluation consistency and reliable human feedback workflows while handling a significant share of assigned evaluation workload.

Data Analyst / AI Trainer — FEMTECH

Jul 2025 – Present

- Review datasets through structured annotation, classification and quality-assurance workflows to support AI model training and evaluation.
- Identify inconsistencies, bias indicators and data-quality issues using established review criteria, documenting findings and escalating defects where appropriate.
- Maintain dataset accuracy, consistency and annotation standards, contributing to reliable training data and improved downstream model performance.

Data Validator / Data Analyst — World Health Organization (WHO)

May 2023 – Jun 2025

- Validated healthcare and public health datasets for completeness, accuracy and reporting readiness using structured data-quality and verification procedures.
- Performed systematic validation, consistency checks and anomaly detection to identify errors, resolve data-quality issues and support reliable reporting.

- Contributed to improved reporting accuracy through disciplined review practices, maintaining high standards of consistency, traceability and data integrity across validation activities.

Full Stack Software Development Trainee

2022 – 2023

- Developed seven web applications and dashboards using modern software development practices, strengthening practical experience across frontend development, APIs and data-driven applications.
- Applied software testing, debugging, API integration and technical documentation practices to understand how digital products are designed, implemented and maintained.
- Built a technical foundation that strengthens the evaluation of AI systems, software products and user experiences by enabling informed assessment of functionality, quality and usability.

SELECTED PROJECTS

- **AI Response Evaluation** — Designed and conducted structured evaluations of AI-generated responses using evidence-based review frameworks, assessing factual accuracy, reasoning quality, instruction adherence, safety and overall user-facing quality.
- **Product & UX Evaluation Case Studies** — Performed structured heuristic evaluations of digital products, identifying usability issues, evaluating user journeys and producing prioritised recommendations to improve product quality and user experience.
- **Evaluation Framework Development** — Developed practical evaluation methodologies, quality dimensions and assessment criteria to support consistent, repeatable assessment of AI responses and digital products.
- **AI Evaluation Publication Platform** — Designed and built a documentation-first AI Evaluation publication platform showcasing evaluation methodology, professional practice, independent reviews and canonical evaluation records, including the published AI-R-001 evaluation archive.

EDUCATION

Bachelor of Public Administration

Kwara State University, Nigeria

PROFESSIONAL DEVELOPMENT

- Full Stack Software Development Programme
- AI Evaluation, Data Annotation & Quality Assessment
- Product & UX Evaluation Practice
- Independent Research in AI Evaluation Frameworks, Human Feedback Systems and Evidence-Based Evaluation Methodologies
